Exhibit W5-4
Soil Survey Report Form

Created: January 1, 2002

Revised: June 10, 2014

Project Name: _____ Date: _____

Project Number: _____ Submitted by: _____

Telephone Number: _____

The presence of corrosive soils along the proposed path of the water main should be investigated in accordance with AWWA C105/A21.5 (a copy of which can be obtained from Water Resources). All areas not investigated shall be assumed to be corrosive. A formal soil survey report or statement of assumed corrosive soils shall be submitted to City Utilities during project design.

CHECK ONE:

A Soil Survey was performed for this project in accordance with AWWA C105/A21.5.

A copy of this report is attached. The survey was performed by _____

A Soil Survey was not performed for this project. The soils in the project are assumed to be corrosive. Protective measures shall be taken where ductile iron pipe is used.
